EXECUTIVE SUMMARY

Machine learning researcher and data scientist specializing in healthcare AI, with experience developing end-to-end NLP and speech-processing pipelines for neurological and psychiatric applications. Skilled across the full machine learning lifecycle, including dataset curation, clinical data engineering, statistical and confounding analysis, model development, evaluation, optimization, and interpretability. Active researcher in responsible AI and AI governance, studying how values shape the design and governance of healthcare AI through stakeholder-informed and anticipatory approaches.

WORK EXPERIENCE

The Douglas Research Centre, McGill University

Graduate Research Assistant

Montreal, QC

Jun 2025 – Present

- Driving speech-based relapse prediction research in psychotic disorders in collaboration with Dr. Lena Palaniyappan and Dr. Alban Voppel by maintaining multisite data collection using REDCap workflows and powering the Voici Speech Bank by engineering and analyzing pipelines to clean, align, and structure longitudinal speech data across diverse studies. This work enables multimodal insights into voice, symptoms, and cognition, paving the way for more predictive, compassionate mental health care.

Applied Perception Lab, Concordia University

Graduate Research Assistant

Montreal, QC

Dec 2024 – Present

- Leading research on anticipatory fairness and governance in healthcare AI, deriving a ten-value, SDG-aligned framework from stakeholder deliberation, applying it to evaluate future deployment scenarios with cross-disciplinary raters, and extending it into ethical personas for governance committees.

Mila - Quebec AI Institute

Collaborating Researcher / Master's Research

Montreal, QC

Oct 2024 – Present

- Leading research on speech as a biomarker for the detection and longitudinal monitoring of Parkinson's disease, covering the full machine learning lifecycle from dataset curation and clinical data integration to model training, evaluation, and optimization, while investigating confounding factors across in-the-wild and clinical recordings.

Concordia University

Teaching Assistant

Montreal, QC

Jan 2025 – April 2025

- Achieving consistent and fair grading for Concordia's Machine Learning course 'Comp 432' by marking labs, delivering prompt feedback, and addressing inquiries from 110 students.

EDUCATION

Master of Computer Science Computer Science <i>Concordia University / Mila - Quebec AI Institute</i>	Montreal, Quebec Jan 2025 – Present
--	--

Bachelor of Engineering Software Engineering GPA (3.67) With Distinction <i>Concordia University</i>	Montreal, Quebec Jan 2019 – May 2024
---	---

HONORS & AWARDS

Power Corporation Of Canada Graduate Fellowship Issued by Concordia University	Jun 2026
--	----------

Arbour Foundation Master's Scholarship Issued by The Arbour Foundation	Sep 2025
--	----------

FRQNT B1X Award Competition – 92/100, Ranked 9th (Funding Cutoff: 8) Issued by the Fonds de recherche du Québec	Apr 2025
---	----------

NSERC CGS-M Award Issued by the Natural Sciences and Engineering Research Council of Canada	Apr 2024
---	----------

NSERC Undergraduate Student Research Award (USRA) Issued by the Natural Sciences and Engineering Research Council of Canada	May 2022
---	----------
